

MAHROUG FADOUA

AI & DATA SCIENCE GRADUATE | SOFTWARE & AI ENGINEERING

Address: Grarem Gouga , Mila, Algeria
Phone: +213 779 296 219
Email: fadoua.mahroug@univ-constantine2.dz
Links: [Github](#) , [Linkedin](#)

SUMMARY

Artificial Intelligence and Data Science graduate with hands-on experience in software development, AI, machine learning, computer vision, NLP, and web/mobile applications. Skilled in Python, Next.js, PostgreSQL, Flutter, and TensorFlow/Keras, with experience building practical projects from development to deployment. Interested in software engineering, AI-powered applications, and data-driven solutions.

PROFESSIONAL EXPERIENCE

Participant — Agri Challenge Hackathon, ENSIA, Algiers Jun 2025

- Participated in a 4-day AI hackathon focused on smart agriculture.
- Built a deep learning model for plant species classification using field-collected data.

Code4Palestine Competition, Ai Nexus Club Jun 2025

- Won an AI competition by developing SAWTNA, an AI assistant to help bypass digital censorship.
- Designed an AI solution to support Palestinian content creators and activists online.

Marketing Manager, Mozilla Campus Club, Constantine Jul 2024 - Sep 2025

- Managed club communications, digital content creation, and outreach campaigns
- Produced promotional material using video editing tools

Scratch Programming Instructor, Boubliaa School, Mila Aug 2024 - Sep 2024

- Delivered beginner coding workshops for children focused on logic, creativity, and problem-solving
- Guided students in building interactive games, fostering excitement for technology

EDUCATION

Master's degree,Data science and artificial intelligence 2025 – 2026

Université Constantine 2 – Abdelhamid Mehri | Constantine, Algeria

Bachelor's Degree , computer science 2021 – 2024

Université Constantine 2 – Abdelhamid Mehri | Constantine, Algeria

PROJECTS

Wireless IoT-Based Weather Monitoring System 2024

Bachelor's Thesis — Université Constantine 2

- Designed and implemented a real-time IoT weather monitoring system using environmental sensors.
- Developed a Flutter application integrated with Firebase for live weather data visualization.

Mouth Recognition System 2025

Computer Vision — Coursework, Université Constantine 2

- Developed a CNN-based mouth recognition system using Python and TensorFlow/Keras.
- Performed image preprocessing, data augmentation, and model evaluation.

Insects Detection in Plants 2025

Machine Learning — Coursework, Université Constantine 2

- Developed a CNN-based mouth recognition system using Python and TensorFlow/Keras.
- Performed image preprocessing, data augmentation, and model evaluation.

GastroNeXia — AI-Powered Endoscopy Platform 2026

Master's Thesis

- Developed a full-stack platform integrating web technologies with AI-powered real-time medical video analysis.
- Integrated computer vision workflows for detection, classification, segmentation, and explainability.

ADDITIONAL INFORMATION

- **Technical Skills:** Python, JavaScript, TypeScript, Dart,Next.js, React, Tailwind CSS, FastAPI, PostgreSQL, Prisma, Supabase, Machine Learning, Deep Learning, Computer Vision.
- **Languages:** Arabic (Native) • English (Intermediate) • French (Intermediate)
- **Certifications:** CCNAV7 – Cisco Networking Academy (Dec 2023)
